

PROFESSIONAL STATEMENT

Passionate about how new technologies like Cloud, Data, AI, Digital Transformation, Agile, Lean, Blockchain, Smart Cities, IoT, ... are disrupting the status quo and changing our world and ways of doing business. The opportunities are limitless, flexibility and change are the answer.

I have a leading character with a "can-do"-attitude and known to go the extra mile to achieve my client's objectives. By combining my active listening and my strong analytical skills I can find the right solution without losing the focus on the business and values of my clients. I achieve this for long term objectives, while guaranteeing the realization of practical quick wins.

ARGENTA

Esperanto is a strategic DATA Management program within Argenta with a main goal to make all data available in order to create added value for the company. Going from designing the LIM, ERD, DV to the CIVL (Corporate Informatie VoorzieningsLaag). Ending by building a Business Glossary, Business terms, RDV, BDV, PL and finally delivering data reports/dashboards ...

UNIGRO n.v.

Focus is the new IT platform, Unigro has built to replace their old mainframe application, giving them an improved application portfolio that should support them in taking the next step in their growth.

Replacing a 15-year old 3Si-group mainframe platform with a new hybrid application landscape consisting of as well public as private cloud applications, ERP, PIM, ... giving them better support for purchasing, marketing, logistics, customer relations, VAT, finance... Redesigning the business processes aligned with the new company strategy is the objective.

Easy integration with other external software should enable them to adapt new IT environments faster than before.

IT Director Benelux

Feb 2015 – Jan 2017

DPD

As IT Director, I oversaw the development, implementation, and use of technology throughout the company, working closely with internal staff & external consultants to assess and address user and business practice needs. Areas of responsibility include the full range of information systems and telecommunications activities, including determining user requirements, recommending practical solutions, and leading firm-wide efforts to improve the effective use of technology.
